Who is behind LikesXL and how does it work?

LikesXL is a subcompany of Setimo AG (Reg No. FL-0002.365.435-5) with its headquarters in Liechtenstein, Hinterbühlen 46, FL 9493 Mauren.

The digital transformation characterizes our social structures, changes economic processes and opens up new business opportunities.

Thus, the business model of LikesXL as it is was unthinkable a few years ago. With the internet there is now the possibility to reach people who could previously only be reached with large marketing budgets.

How does LikesXL work?

LikesXL is an affiliate- or shop system, which hands almost all of his commissions he receives from retailers/producers or service to his partners and only retains a small amount to keep the platform going.

Affiliate systems are internet-based distribution forms, in which a commercial provider generally remunerates its partners with commissions. Why do these retailers pay commissions? Quite simple - LikesXL offers the opportunity that many people look at the retailer's advertisements. This increases the chance that his products are made visible and purchased worldwide.

Through the greatest possible dissemination of the commissions to the user, LikesXL makes it possible that besides looking at advertisements the customers buy and stay on the site and come back.

How can I earn money?
